About OpenMed

The overarching goal of OpenMed is to raise awareness and facilitate the adoption of Open Educational Resources (OER) and Open Educational Practices (OEP) in the South Mediterranean region, with a particular focus on Egypt, Jordan, Morocco and Palestine.

OpenMed fosters the role of universities as knowledge providers not only to their on-campus students but also beyond the walls of institutions, especially towards disadvantaged groups (e.g. low-income peoples, disabled students, people living in rural areas, learners at risk of low achievement, refugees).

Members of the Consortium
